Proof of the Main Theorem

There Is No Largest Prime Number

Fuklid

Proof of the Mair Theorem

Theorem

There is no largest prime number.

The proof uses *reductio* ad absurdum.

Proof.

- 1. Suppose *p* were the largest prime number.
- 2. Let a be the product of the first p numbers
- 3. Then a + 1 is not divisible by any of them.
- 4. Thus q + 1 is also prime and greater than p.
